

EXERCISE - LOOPS

- Use for loop to iterate from 0 to 100 and print only even numbers.
- Use for loop to iterate from 0 to 100 and print only odd numbers.
- Use for loop to iterate from 0 to 100 and print the sum of all numbers.
- Use for loop to iterate from 0 to 100 and print the sum of all evens and the sum of all odds.
- Use for loop to iterate from 0 to 100 and print the sum of all evens and the sum of all odds. Print sum of evens and sum of odds as array
 - OP : [2550,2500]
- ["ALBANIA", "BOLIVIA", "CANADA", "DENMARK", "ETHIOPIA", "FINLAND", "GERMANY", "HUNGARY", "IRELAND", "JAPAN", "KENYA"]
- Using the above countries array, create an array for countries length.
- Using the above countries array, find the country containing the biggest number of characters.
 - OP : Ethiopia
- Using the above countries array, find the country containing only 5 characters.
 - OP : ['JAPAN', 'KENYA']
- Using the above countries array, reverse the order using loop without using a reverse method
